

## CONTACT

+91 9848468149

praveenkumar.kondaparthi@gmail.com

## EDUCATION

2013  
Bachelor of Arts  
Gitam University

## CORE COMPETENCIES

Web Development Lifecycle  
Frontend Development  
Software Development Lifecycle  
Project Management  
Agile Methodologies  
Requirement Gathering  
User Experience Design  
Client Relationship Management  
Quality Assurance  
Web Performance Optimization  
Mobile Responsiveness  
System Architecture Design  
System Optimization

## IT SKILLS

React.JS, Redux and RTK  
JavaScript, TypeScript  
Next.JS, GraphQL  
HTML  
CSS, SASS  
JSON, jQuery  
Visual Studio, VS Code  
JIRA  
GIT, Bitbucket  
npm, yarn

## SOFT SKILLS

Analytical Thinking  
Communication  
Problem- solving  
Leadership

# PRAVEEN KUMAR KONDAPARTHI

## OBJECTIVE

Utilize **over 14 years** of expertise in **User Interface Design/Development** to thrive in a dynamic position within the technology industry, emphasizing **project commencement, implementation, and achieving successful outcomes**.

## PROFILE SUMMARY

- Currently excelling as a **Technology Specialist** at **Coforge Digital IT Solutions & Technology Consulting Services, Bangalore**.
- Possess a diverse skill set encompassing technologies like **React JS, HTML5, CSS3, Redux, Ant Design, JavaScript, jQuery, JSON, and Bootstrap**.
- Displayed expertise in **developing web applications, particularly adept at React Hooks and building custom react-hooks**.
- Proven track record in **utilizing Redux** for **efficient application state management** and familiarity with middleware such as **redux-thunk**.
- Proficient in **CSS frameworks** like **Material UI, Ant Design, Bootstrap, Styled-components, and CSS preprocessors** like **SAS**.
- Skilled in **utilizing REST APIs** for seamless communication with backend servers.
- Extensive experience and adeptness in **ES5, ES6, and Typescript**, coupled with proficiency in tools like **npm, yarn, JEST, React Testing Library, Git, Bitbucket, and JIRA**.

## WORK EXPERIENCE

**Technology Specialist | Coforge Digital IT Solutions & Technology Consulting Services, Bangalore | (Feb'22- Dec'23)**

### Key Responsibilities:

- Successfully led or contributed to the development and integration of technology solutions; ensured timely and quality delivery of software or system projects.
- Minimized system downtimes and errors through effective development and integration practices.
- Provided efficient technical support to end-users and resolved issues promptly.
- Maintained a high level of customer satisfaction by addressing and resolving technical problems effectively.
- Stayed updated on emerging technologies relevant to the organization; evaluated the feasibility and benefits of adopting new technologies.
- Successfully implemented and integrated selected technologies to improve overall efficiency; implemented and enforced security measures to protect systems and data.
- Conducted regular security audits and took corrective actions to address vulnerabilities.
- Monitored system performance and identified areas for improvement; implemented optimizations to enhance system efficiency and resource utilization.
- Maintained comprehensive documentation for systems, processes, and configurations.
- Facilitated knowledge sharing among team members to ensure collective expertise.
- Collaborated with vendors to ensure the timely delivery of services and products; evaluated vendor performance and negotiated contracts to achieve cost-effectiveness.
- Effectively planned and executed technology projects within defined timelines and budgets; collaborated with cross-functional teams to achieve project goals.
- Identified opportunities for process improvement and technological advancements; implemented initiatives that enhanced the overall effectiveness and efficiency of technology operations.

● **Software Engineer | InnRoad Software Development Services Pvt. Ltd., | (Jun'13- Nov'21)**

**Key Responsibilities:**

- Delivered high-quality, maintainable, and efficient code within specified timelines.
- Contributed to the design and architecture of software systems; ensured adherence to coding standards and best practices.
- Collaborated with cross-functional teams to align software design with business objectives.
- Conducted and participated in code reviews to maintain code quality; implemented and advocated for best practices related to code quality and testing.
- Collaborated with quality assurance teams to identify and address software defects.
- Diagnosed and resolved complex technical issues efficiently; collaborated with peers to troubleshoot and debug software problems.
- Worked effectively within an Agile/Scrum development environment; collaborated with cross-functional teams, including product owners and QA, to deliver user stories and features.
- Worked closely with product managers to understand requirements and delivered functionality that met user needs; ensured that developed features aligned with overall product goals.
- Implemented and maintained continuous integration and deployment pipelines.
- Automated testing and deployment processes to achieve faster and more reliable releases.
- Created and maintained technical documentation for code, APIs, and system architecture.
- Provided clear documentation for troubleshooting and future development efforts.
- Communicated effectively with non-technical stakeholders to gather requirements and provided updates.
- Collaborated with cross-functional teams to align development efforts with organizational goals.
- Participated in meetings and discussions to enhance collaboration and project outcomes.

● **UI Developer | vSplash Techlabs Pvt. Ltd., Hyderabad | (Oct'09- Jun'13)**

**Key Responsibilities:**

- Developed and implemented user interface designs based on project requirements and user experience principles; ensured the creation of visually appealing, responsive, and user-friendly interfaces.
- Maintained and adhered to coding standards, ensuring clean, modular, and efficient code; conducted regular code reviews and participated in peer-to-peer feedback sessions to enhance overall code quality.
- Identified and addressed performance bottlenecks in UI code to ensure optimal user experience.
- Conducted regular performance testing and optimization of UI elements for faster load times and responsiveness.

**PERSONAL DETAILS**

**Date of Birth:** 13<sup>th</sup> June 1985

**Languages Known:** English, Hindi & Telugu

**Location:** Hyderabad

## ANNEXURE- PROJECTS UNDERTAKEN

- **Project: Betagro | Sr. Software Engineer | (Apr'23- Oct'23)**  
**Project Type: E-commerce Dashboard Development**  
**Technologies used: ReactJs, Node.js, Material UI and Redux**

### Key Responsibilities:

- Contributed to the development and enhancement of the project's frontend components.
- Conducted thorough code reviews as part of the PR process.
- Interacted proactively with Quality Assurance personnel during system testing phases.
- Collaborated effectively to address and resolve issues identified during application testing.

- **Project: HoneyComb Web | Sr. Software Engineer | (Feb'22- Apr'23)**  
**Project Type: Dashboard Web Application Development**  
**Technologies used: ReactJs, NextJs, TypeScript, GraphQL**

### Key Responsibilities:

- Engaged as an independent contributor in a development project, focusing on creating a comprehensive Storybook for the construction of reusable components.
- Dedicated efforts towards the construction of reusable components and the development of front-end libraries, ensuring their applicability for future projects.
- Applied expertise in front-end technologies such as ReactJs, NextJS, GraphQL, and Typescript to enhance project functionalities.
- Collaborated closely with backend developers to ensure seamless integration and cohesion between front-end and back-end components.
- Actively participated in peer-to-peer code review sessions, contributing valuable insights and feedback for code enhancement.
- Undertook the responsibility of reviewing and providing constructive feedback on Pull Requests (PRs), diligently updating comments to improve code quality.
- Maintained effective communication with Quality Assurance personnel during system testing phases, facilitating collaboration and addressing any issues in the application development process.

- **Project: Guest Service | Sr. Software Engineer | (Oct'19- Nov'21)**  
**Project Type: Application Development and Migration to React JS**  
**Technologies used: React JS, REST WEB API, HTML5, CSS3, Bootstrap, JavaScript**

### Key Responsibilities:

- Developed React components for diverse modules encompassing Guest Info and Marketing Info.
- Utilized JavaScript to implement client-side data binding, manage AJAX requests, and conduct UI validations.
- Kept Requirement and Design Documents up-to-date, aligning them with client specifications.
- Actively participated in the agile development process, contributing to the design and development of software.
- Conducted requirement gathering from business stakeholders and defined system specifications.
- Implemented new user-facing features using React.js, emphasizing the creation of reusable components and front-end libraries for future applications.
- Translated designs and wireframes into high-quality code, optimizing components for optimal performance across various web-capable devices and browsers.
- Engaged in peer-to-peer code review sessions to enhance code quality and collaboration.
- Constructed UI elements following the application style guide for consistent usage.
- Collaborated closely with .NET and NodeJS developers to generate backend requirements while building front-end business applications.
- Maintained communication with Quality Assurance personnel during system testing phases of application development.
- Implemented business logics for reports and iteratively updated requirement and design documents based on client requirements.

- **Project: Reservation Module | UI Engineer | (Mar'13- Sept'19)**  
**Project Type: Application Development**  
**Technologies used: HTML, CSS3, Bootstrap, Sass, KnockoutJs, ReactJS**

### Key Responsibilities:

- Collected business requirements and outlined specifications.
- Converted designs and wireframes into code of superior quality.
- Developed UI elements in accordance with the application style guide for consistent usage.
- Participated in peer-to-peer code review sessions.
- Formulated a Style Guide for the latest enhancements.
- Constructed front-end business applications and collaborated closely with .NET and NodeJS developers to generate backend development requirements.
- Engaged with Quality Assurance personnel during the system testing phases of application development.
