PROJECTS

“AMAZON CLONE” (<https://github.com/RaghuDekonda/Amazon-clone.git>)

- This is basically a cloned website of Amazon where I have included animations and transition which improves user experience. I have done this using HTML and CSS.

“CARECORD” (<https://github.com/RaghuDekonda/carecord.git>)

- This is an SQL based project. In which we will upload all the datasheets to database and analyse the data sheets based on requirements and provide desired output based on the analysis.

“UNMANNED DEFENDER”

- The main aim of this project is to detect landmines and protect human lives from it. It's mainly using a motor driver, Bluetooth module and copper coil, which is controlled by mobile applications.

“SMART CROP PROTECTION FROM ANIMALS USING ARDUINO”

- This project uses PIR and ULTRASONIC sensors for detection of abnormal moments in the surroundings and protect crop from damage.

“TIC-TAC-TOE” (<https://github.com/RaghuDekonda/tic-tac-toe.git>)

- It is basically a game that is built by using HTML, CSS and JS. It is for two players O and X. The players take turns placing their marks on a grid of three-by-three cells. If a given player gets three marks in a row horizontally, vertically, or diagonally, then that player wins the game.
