EXECUTIVE SUMMARY

5 years 7 months of overall industry experience in the field of Information Technology which includes 3 years of Experience as a **React Js Developer**. Currently looking for new opportunity as a **React Developer**.

Successfully handled multiple priorities, with a bias for action and a genuine interest in personal and professional development.

SKILLS

Language / Scripts / Technologies: Next Js, React Js, SWR Hook, Redux, JSON, AJAX, HTML, CSS, JavaScript, jQuery, Sass, Bootstrap 3 and 4, Material UI, PHP.

Graphical: Adobe Photoshop, Adobe InDesign.

Database: SQL.

EXPERIENCE

Ekahal, Mumbai - React Developer.

January 2023 – June 2023

As a React Developer, my core activities include:

- Developed and maintained multiple web applications using **React JS** and **Next JS**.

- Collaborated closely with **UI/UX** designers to implement **responsive** and **visually appealing** interfaces.

- Implemented **front-end features and functionality** based on project **requirements** and **design specifications**.

- Worked with backend developers to **integrate API** endpoints and ensure **smooth data flow** between the **client and server**.

- Assisted in **troubleshooting** and **resolving** production **issues** and **bugs**.

Orion Labs India, Mumbai - Front-End Web Developer.

May 2020 – December 2022

As a Front-End Developer, my core activities include:

- Building **stable** and **maintainable** codebases using **React JS** and **other relevant technologies**.

- Collaborating with a team of designers to create **effective user experiences**.

- Creating **modular, browser-compatible, mobile-responsive** templates using **modern CSS** techniques and **JavaScript** libraries.

- Performing **code reviews**, **debugging** issues, and **solving clients' problems**.

Wagtail Technologies, Mumbai - Web Designer and Front-End Web Developer.

August 2017 – April 2020

As a Front-End Developer and Web Designer, my core activities include:

- Design **Web Applications** according to clients' briefs and **modify design** to meet changes in **clients' specifications**. And converting design **wireframes** into **website elements** that users can interact with.

- Creating **browser-compatible, mobile-responsive** templates using **modern CSS** techniques and **JavaScript** libraries.

PROJECTS

Note: The projects I have added here are some of recent project that I have worked on.

Trip Organizers - React Js Web Application

I've contributed to this **React-based project** centered around developing a **trip itinerary creator** tailored for **trip organizers**. This project employed **Redux for state management** and involved intricate **features** like **user authentication (sign-in and registration)**, integrating **actual maps** for users to **create trip itineraries**, and **adding day-to-day activities** including food, beverages, and events. Additionally, users could **follow each other**, **copy itineraries**, and **save them to their profiles**.

In my capacity as a **React developer**, I was **responsible for maintaining and enhancing** this complex project. This entailed **implementing APIs to fetch and post data**, **managing project state with Redux**, **rendering fetched data** for user display, and **manipulating data as needed**. I also contributed features such as **implementing drag-and-drop functionality** for itinerary activities and **enabling users to add pictures** for scheduled locations or events.

Admin Panel - React Js Web Application

I contributed to a **React Js and Next Js project** for a **foreign-based company** that focused on **user authentication**, **API integration**, and **complex user management**. The project included features such as **session-based authentication**, **user registration**, and **role-based access control**. Additionally, I worked on **creating subdomains** for the company's various subsidiaries, **implementing a cab booking system**, and **developing an admin panel for data management**.

My responsibilities included **retrieving and posting data from the API**, **displaying data in tables**, **implementing CRUD functionality**, and **creating and maintaining UI components**. I also worked on **new features** such as **integrating maps** for users to **define zones**, **adding data to these zones**, and **calculating cab pricing within and between zones**. Other tasks involved **creating mail templates**, **sending individual and bulk emails**, and **implementing advanced filtering and data syncing functionalities**.

Overall, my role was to **enhance and maintain the admin panel**, ensuring **efficient data management** and providing users with **intuitive interfaces for accessing and manipulating data**.

Admin Panel for Task Creation and Management App - React Js Web Application

I developed a **comprehensive Admin Panel** using **React Js and Next Js**. The panel boasts **robust features** including **user authentication via session management (registration and login)**, **seamless integration with the main app** to **display registered user data**, **presenting user information in tabular form** alongside tasks created **within the main app**, **interfacing with APIs for data retrieval and posting**, **implementing filtering functionality for data tables**, **conducting CRUD operations for data manipulation**, and **enabling users to download table data in Excel format**.

Additionally, I oversaw the **creation of UI components**, managed **data fetching and manipulation processes**, **implemented user authentication mechanisms**, **integrated filtering capabilities** into the table display, **monitored and managed user activity status**, and ensured the **presentation of pertinent additional data on the dashboard**.

EDUCATION

Elphinstone College - B.Sc. (IT) 2013-2016, Aggregated Score: 64.15%

Elphinstone College - H.S.C (Science) 2013, Aggregated Score: 49.33%

St. Josephs' High School - S.S.C 2011, Aggregated Score: 73.27%
