PROJECTS

Medical Store Management System | Java Swing, JDBC, MySQL, Jasper Report

- Developed a Stand-Alone Application based on Pharmacy related tasks like Medical Billings/selling and Management.
- The application was developed for a specific shop owner so that they can manage their Pharmacy conveniently.
- This Application will help the store manager to manage and efficiently sell the medicines, so that manual work will be reduced.

Krushhi Store | Android, Java, Firebase

- This Application is helpful for Farmers, they can upload, and sell their products to end customers without dealing with the dealer so they'll get a profit.
- Krushi Store is Trying to Connect Factories / Manufacturers to Indian Farmer.
- Any Manufacturer can register for free and Publish Products for Free.

Attendance Portal | HTML, CSS, Javascript, MySQL, PHP

- Attendance portal of our college website.
- It supports many functionalities like view, edit, record attendance of students by faculty.
- It also provides students to keep track of their attendance of their respective courses.
