Career Objective:

A highly motivated and experienced data warehousing professional seeking a Senior Informatica PowerCenter Developer/ Technical Lead role in a fast-paced organization With over 10 years of experience in ETL design, development, testing, and implementation, I am confident in my ability to contribute to the success of the company My expertise in designing complex mappings using Informatica PowerCenter transformations and my ability to work independently or as part of a team make me an asset I am committed to staying up to date with the latest technologies and industry trends, and I have a proven track record of delivering high-quality, scalable, and efficient solutions that meet business requirements

In this role, I can leverage my strong problem-solving skills, technical background, and interpersonal skills to help the organization achieve its goals I am also eager to take on new challenges and continuously improve my skills to provide the best possible support to the business

Work History:

- Lead Consultant, Wipro Technologies | Jan 2020 – Present

In this role, I have gained extensive experience in leading complex ETL projects for clients in a variety of industries I work closely with business and IT users to understand their requirements and deliver high-performance, scalable solutions using Informatica Power Center I have also played a key role in training and mentoring junior team members and have demonstrated strong leadership skills in a fast-paced, deadline-driven environment

- IT Analyst, Tata Consultancy Services | Jul 2012 - Dec 2019

In this role, I was responsible for supporting the development, implementation, and maintenance of ETL processes using Informatica Power Center I worked with a team of developers to ensure the timely and accurate delivery of projects and was instrumental in identifying and resolving performance issues that arose during production I also had the opportunity to work on large-scale data migration projects, where I leveraged my expertise in SQL and Unix to develop and implement efficient data extraction and loading processes

Technical Skills:

- Data Warehousing Tools: Informatica Power Center 9x/10x, Informatica Data Quality
- Databases: Oracle 10g/9i, MS SQL Server 2005, MySQL, Sybase
- Programming GUI: SQL Developer, PL/SQL Developer, UNIX Shell Scripting
- Operating Systems: Windows, UNIX
- Application Tools: Service NOW, Jira, GCRM

Education:

Degree	Year of Passing	University/Board	Percentage
BSC	2012	Osmania University	61.7%
Intermediate	2009	Board Of Intermediate	72.7%
SSC	2007	SSC	70.1%

Project Experience:

Current Role: Informatica Technical Lead

Current Organization: Wipro Limited

Experienced Informatica Technical Lead with a background in data warehousing, ETL design, development, testing, and implementation. Currently, I am employed at Wipro Limited as an Informatica Technical Lead & Developer, where I am delivering high-quality and efficient solutions to the Confidential Oil & Gas project. My expertise includes leading a team, collaborating with business and IT users, and providing technical design and development documentation. I am dedicated to staying up to date with the latest technologies and industry trends.

Roles & Responsibilities:

- Leading a team of 10 offshore personnel in the maintenance, support, and enhancement of existing applications for the Confidential Oil & Gas project
 - Collaborating with business and IT users to gather ETL requirements and address performance and data issues
 - Acting as a liaison between functional SMEs and technical team to align requirements with source systems and develop technical designs
 - Analyzing business requirements, providing timeline estimates, and presenting costs to business owners
 - Managing tasks and deadlines for the ETL team
 - Conducting code, design, and documentation reviews for Informatica projects
 - Facilitating daily technical discussions with offshore team members and setting expectations for delivery
 - Designing and developing complex mappings using Informatica transformations such as Unconnected and Connected Lookups, Source Qualifier, Routers, Filter, Expressions, Aggregator, Joiner, and Update Strategy
 - Conducting reconciliation, evidence creation, QA, and production deployment
-

Previous Organization: Tata Consultancy Services

Duration: Dec 2016- Dec 2019

Position: Senior Informatica Developer

Description:

The project aimed to migrate data from an older Salesforce instance to a new instance specifically for LATAM countries.

Roles & Responsibilities:

- Analyzed business requirements and functional specifications
 - Designed and developed data migration solutions by extracting, transforming, and loading data from various sources including Oracle, SQL Server, and flat files
 - Implemented a variety of Informatica PowerCenter transformations, including Router, Aggregator, Normalizer, Joiner, Expression and Lookup, Update strategy, and Sequence generator
 - Created reusable transformations and maplets to improve efficiency and reduce redundancy
 - Developed functional and LLD documents for the project
 - Conducted unit testing and maintained test logs and test cases for all mappings
 - Investigated and resolved bugs that arose in the non-production environment and provided on-call support as needed
-

Domain: Telecom

Duration: Nov 2015- Nov 2016

Position: Informatica Developer

Description:

The program aimed to simplify the current complexities and optimize costs while ensuring a smooth customer journey towards the next-generation networks and services

Roles & Responsibilities:

- Developed various ETL objects such as Mappings, Sessions, Workflows, Email Tasks, Command Tasks, etc
 - Implemented SCD 1 and SCD2 in mappings
 - Applied various performance tuning techniques on Sources, Targets, and Mappings in Informatica
 - Conducted testing of developed code
 - Managed defects to ensure quality assurance and to test all business requirements
 - Worked on bug fixes and change requests, which involved understanding business requirements, development, testing, and migration
 - Provided technical assistance and support to analysts and the business community
-

Domain: General Electric

Duration: Jul 2012- Oct 2015

Position: Informatica Production Support Analyst

Description:

The project aimed to provide production support, unit testing, and execute enhancement requests

Roles & Responsibilities:

- Involved in regular system audits to ensure accuracy of various environments and applications, monitoring batch processes, and performing troubleshooting using Power Center logs, UNIX scripts, and Database SQL processes
- Responsible for analyzing, designing, and developing ETL strategies and processes, and writing ETL specifications
- Documented a user guide with the end-to-end process flow for the support team
- Experienced in checking file transfer activities via FTP and SFTP

Achievements & Certifications:

- Awarded "On the Spot Award" 7 times from TCS organization for outstanding performance across different projects
- Received client appreciation for exceptional contribution in successful project deployed and faster resolutions
- Multiple accolades for leading Corporate Social Responsibility (CSR) activities at the domain level
- Completed Six Sigma Green Belt certification
