

CURRICULAR VAITE

Name: MARZINA KHATOON

Email: khatoon123marzina@gmail.com

Mobile: +918797930652

Summary:

- **6+ Years of IT experience in Developing, Designing applications in Asp.Net MVC, Asp.Net, and Win Form with C#.Net.**
- Strong Knowledge on **Object Oriented Programming Languages.**
- Successful in a team environment or working independently and driving juniors.
- Driven to make a positive impact on a project in any role and to meet challenges and surpass expectations.
- Good analytical, programming, troubleshooting and debugging skills

Education Qualifications:

- Bachelor of Technology in Electronics & Instrumentation Eng. from BPUT University with a CGPA of 69.1 % from 2009 to 2013.
- HSC in Math-Group from J.A.C Board of 52.20 % in 2007.
- SSC from J.A.C Board of 56.40 % in 2004.

Experience Summary:

- Worked with **Mihira Technology** as a **Sr. Software Engineer in Jamshedpur Jharkhand** from September 2017 to Nov 2020.
- Worked with **TCS** pay roll of Future focus Infotech as a **software developer** in Kolkata West Bengal from 15 Dec 2020 to 05th Oct 2021.
- Currently working with **TCS** as **I.T.Analyst** in Jamshedpur Jharkhand from 6th Oct 2021 to till date.

Technical Experience:

Microsoft Technologies	Windows form, ASP.Net MVC 5, ASP.NET, C#.Net, ADO. Net, ASP.NET AJAX,LINQ
Web Technologies	HTML, XML
Scripting Languages	JavaScript(jQuery 3.1.1)
Operating Systems	MS-Dos, Windows XP/2007/2010
Database	SQL Server 2008/2014, MS Access/Oracle with Oracle SQL developer IDE
Web Servers	Internet Information Server (MS-IIS 6.0, 8.0 Express)
IDE	Visual Studio 2008/2012/2015/2019
Designing Tool	Microsoft Visio
Reporting Tool	Crystal Report 8.0, Report Viewer

KEY SKILLS:

Understand functional requirements and should be able to develop technical design, using standard patterns and be able to communicate the same effectively to the team members.

- Analysis and identify gaps in functional/business requirement and should be able to effectively
- Communicate with both Business and Functional analysts on the same.
- I able to perform independent code reviews and execute unit tests on modules developed
- I have strong in OOPS concepts C#.net, Collections, Generics
- I have experience in Web Technologies ASP.net (Web Forms, MVC), JavaScript, and HTML
- I have experience in Win Technologies Win Forms.
- I have experience in ADO.NET and any OR mapping engines.
- I have about knowledge on Enterprise Library.
- I have experience on IIS

- I have experience on various design patterns & Dot NET patterns also have knowledge on UML (Class, Sequence, and Domain Model)
- Strong knowledge on RDBM concepts. Ability to Write SQL with complex joins, Stored Procedures
- I am able to Host Project on main server through **Godaddy.com**, **FileZilla** and **ParallelX**

PROJECT DETAILS:

Current Project Details#

Title	MES
Client	Tata Steel
Role	Software developer
Environment	ASP.NET, C#.NET, JQuery, Oracle.
Team Size	7

Description:

In this project there are different module
MCR (Material Creation Request),
Mill Schedule (For order creation roll change activity),
Newmes (production posting and recording activity perform by this application),
tubesApp(All under freight material loaded vehicles need approval for exit)

Objective of all above module is that first ordered material creation request will be done through the MCR system and during this request will flow through the respective approval having mail intimation in every stage at last SAP team will create new material.

For order creation or roll change all the activity done by the supply chain by using Mill schedule. Scheduling quality and mill operation.

Responsibilities:

- Developed UI forms.
- Created stored procedures.

Involved in design and development of various system events

Project #

Title	OVRS Change Management System
Client	Tata Steel
Role	Software developer
Environment	ASP.NET MVC5, C#.NET, Entity Framework, JQuery, SQL Server.
Team Size	9

Description:

Objective of the Project is that make changes of existing vendor details, and for changing process there involve different type of work flow.

Responsibilities:

- Developed UI forms.
- Created stored procedures.

Involved in design and development of various system events

Project #

Title	Guruedu
Client	Internal
Role	Software developer
Environment	ASP.NET MVC5, C#.NET, Entity Framework, SQL Server.
Team Size	6

Description:

Objective of the Project is that make Education System easiest and Interesting for every aspects, it may be School chair person, Admin, Teachers' and Student point of view. If chairperson want to know anything related to their School like meeting, Sports, who is class teacher of which class and about stake holder, about student what they are learning and how much syllabus is completed all report will be easily get through single click. It will eliminate the gap between Chair Person, Admin has rights to make Master Enter like class entry, section entry , Provide teachers Id, password and many more, and Teacher has granted for a particular class and section and class teacher has permission to registered their class student and every student has their own user id and password, Teacher will uploads their notes and student will download easily from anywhere just login by providing their credential , even if a student is unable to attending any classes just because of illness , medically unfit, marriage function whatever the reasons they will be updated through online notes, There is also online Test facilities teacher will prepare Question and fixed time for test as student will appear test as desire time reached test will be finish and marks will be sent to their parents register mobile no, Due to this Gurukool Online will reduce communication gap between Teachers, Student and their parents related to child education it will reduces all the excuse given by the student like ,I don't know, I was absent, I don't have note ,and teacher will get more time to explain their subject, Gurukool Online is simply single time teacher efforts will work for entire next coming session.

Responsibilities:

- Developed UI forms.
- Created stored procedures.

Involved in design and development of various system events

Project#

Title	Taste Point
Client	Mihira Technology
Role	Software developer
Environment	ASP.NET 2008, C#.NET, Entity Framework, J Query, SQL Server.
Team Size	6
Url	tastepoint.in
Duration	14 Months

Description:

This website helps to our client with no. of features available for online order food. We will be going to provide Email confirmation for orders as well as randomly generate password at the time of registration and extra features if a user don't want to register themselves they can order food as a guest login.

Web Application contains 2 modules

Administration Module

Users (Authorized & Unauthorized)

Admin is Responsible to create, edit, and delete the records. Admin has rights to make User to access particular webpage in admin module so that admin burden will reduce and this user become a authorized user for that webpage and user can access that page. Admin should be able to see the list of individual report, consolidated report, the project was done in N-Tier architecture.

Responsibilities:

Handle All modules also maintain it.

Implemented user interface using HTML, CSS and JavaScript

Used Validation Controls in ASP.Net as well as jQuery for validating Front-end form

Extensively used Grid Views with sorting and paging

Extensively used List Views with sorting and paging

Involved in the all Phases of Software Development Life Cycle like Requirements Gathering, Analysis, Design, Implementation and Testing.

Project#

Title	Drishti Dan Phaco Center
Client	Drshti Dan
Role	Software developer
Environment	Win Form, C#.NET, Ms access.
Team Size	5
Duration	9 Months

Application contains 2 modules

- Administration Module
- Users (Authorized & Unauthorized)

Descriptions:

This project helps to our clients to manage Sale, Order, Purchase, and Monthly Billing to distributor. In this project there is two module one for Admin and other for user ,Admin has rights to Create new user and provide user id and password, and also provide access to user in which web form or report user can access or not ,database backup.

And different types of report, stock Order, date wise sale, sale balance and so on.

And after 11 month user will got message for renew and after 1 year completion Client has to renew the Application otherwise it will gone closed.

Responsibilities:

- Involved in the **Admin Module, Other Modules also.**
- Using Window form coded using C#.Net with Access database

Project#

Title	Billing
Client	TDRC Canteen Jusco
Role	Software Developer
Environment	Win Form, C#.NET, Ms Access.
Team Size	5
Duration	6 Months

Application contains 2 modules

- Administration Module
- Users (Authorized & Unauthorized)

Descriptions:

This project helps to our clients to manage KOT Sale, In this project there is two module one for Admin and other for user ,Admin has rights to Create new user and provide user id and password, and also provide access to user in which web form or report user can access or not ,database backup.
