Sujith SoundaraPandian.K (Full Stack Engineer)

Handphone: +91 9363474903 Email: sujith.spk46@hotmail.com

LinkedIn: www.linkedin.com/in/sujith-k-10b29425a

OBJECTIVE:

A competent person with profound knowledge and interest in Computer Science and Engineering field, looking for an opportunity to showcase my potential and keeping myself updated to the current trends through continuous effort and there by contributing the best for your reputed organization.

PROFESSIONAL SUMMARY:

- 7.5 years of experience in Software Development and Designing for Web Based Applications.
- Hands-on experience in Html,Css,Javascript,React.js,C#,Sql,WebApis.
- Good Knowledge of Reviewed code, debugged problems and corrected issues.
- Technical expertise in all aspects of Object Oriented Programming concepts to develop UI components that could be reused across the Web Applications.
- Extensive Knowledge in developing User Interface by using the React. Js for Single Page Applications(SPAs).
- Passionate in Studying and Implementing it in Good New Resourceful Products.
- Designed Css templates for all use in all pages on the website working with Css Background,positioning,text,border,margin,padding and tables.
- Responsible to Style,Look and Feel of the Webpage with Css with dynamic behavior.
- Develop front-end features, components and libraries, translating designs and wireframes into high-quality, reusable code optimized for maximum performance across various web-capable devices and browsers.
- Experience in Restful web services to integrate between Server side to Client side.
- Experience in various types of Development, analyze requirements and create detailed specifications for program development, partnering with architects and development team to design, code, test, debug, document and maintain software and applications.
- Demonstrate ability to lead and contribute to technical discussions, participating in and facilitating daily stand-ups, bi-weekly sprint planning, and sprint retrospectives.

Knowledge Snapshot:

- Active listening the business requirement and Preparation of UI Screen.
- Analyzing and Optimizing the code, Design and Functionality Of Web Based Applications.
- Created Responsive Web Design as per the Requirements.
- Checking the End flow of Completed Application until move to Production Environment.

<u>Programming Languages:</u> React-JS,React-native, C#,Asp.Net,HTML5,CSS3,JavaScript, Jquery,Bootstrap,MaterializeCss.

<u>Database</u>: MS Sql Server 2012/2017, Rest APIs.

<u>Tools Worked:</u> VisualStudio Code, Visual Studio 2015/2017, Brackets, Docker.

WORK EXPERIENCE:

Company 4: Cyient merged from KlausIT Solutions Pvt Ltd.

Duration: (04/10/21) to (02/05/23)

Years: 1.7 years

Role: Software Engineer

EmpNo: 68575

Project 3: FDRS Application

Client 3: Ford

Description: FDRS | Developer(React)

Ford Diagnostic Repair System using Webapis preparing UI Screens based on Ids for the User.For Each Modules we create separate New tabs and controls, status checks, Value Changes etc.

Languages: React.js, Javascript, Html, Css.

Source Control: git

Build and dependency management: Node.js,npm,RestfulApi.

Summary:

- Created and Developed Resource Management for Add, Update for Any Resource.
- Design the solution based on the requirements Based on ID and Unique Numbers given for the project.
- Coding and developing the new modules and New Screen/Tab.
- Creating Records and History based on Ids and Numbers.
- Fetching Api Data from Services and polpulating in UI Screen.
- Application Enhancements as per the Client Requirements.
- Conducting daily status meetings with the team member to get the status of the project.

Project 2: RFA Application

Client 2: Robert Bosch

Description: (RobotFrameworkAutomation) | Developer(React)

Languages: React.js, Javascript, Html, Css.

Source Control: git

Build and dependency management: Node.js,npm,RestfulApi.

Summary:

- Created and Developed documents using Service calls.
- Fetching the documents from Services and polpulating in UI Screen.
- Coding and developing the new modules and New Screen/Tab.
- Creating Records and History based on Ids and Numbers.
- Fetching Api Data from Services and polpulating in UI Screen.
- Application Enhancements as per the Client Requirements.

Project 1: TFMS

Client 1: Robert Bosch

Description: (Test Farm Management System) | Developer(React)

Languages: React.js, Javascript, Html, Css.

Source Control: git

Build and dependency management: Node.js,npm,RestfulApi.

Summary:

- Created and Developed Login Credentials for Users Using Service calls.
- Fetching Api Data from Services and polpulating in UI Screen.
- Coding and developing the new modules and New Screen/Tab.
- Using RestApi Creating Online Booking Of Systems As Per Each User.
- Setting up New Background Enivronment with Time Limit Form user has Logged In to the system and Terminating all work process after Logout of User.
- Application Enhancements as per the Client Requirements.

Company 3: Infosys, BPM.

Duration: (20/02/19) to (16/10/20)

Years: 1.8 years

Role: Software Engineer

EmpNo: 9006791

Project 3: Fleet Management Application.

Description: Fleet Management Application(SPA) | Developer(React)

Languages: React.js, Javascript, Html, Css.

Source Control: git

Build and dependency management: Node.js,npm,RestfulApi.

Summary:

- Requirement gathering for any new functionality/feature.
- Verify the Requirement, Analysis and Estimation document.
- Design the solution based on the requirements. Creating high level and low level scenarios for the project.
- Construction and Implementation of the inventory design.
- Coding and developing the new modules.
- Conducting weekly status meetings with the team member to get the status of the project.

<u>Project 2:</u> ORACLE | Eloqua <u>Description:</u> ORACLE | Eloqua. Languages: Html,CSS, javascript.

Summary:

- Designed and Created Landing Pages, Campaigns, Segments, Emails, Lead Scoring Models, Dynamic Content, Field Merges and CDO's.
- Using API Calls Creating contacts and form using JASON Format.
- Worked on Subscriptions, Programs, Tracking, HyperLinks and Microsites.

Project 1: SQA WorkBench Tool.

Description: SQA WorkBench Tool Application | Developer(Asp.Net)

The Tool Main Purpose is maintaining of all resources Onboarding and Offboarding Data and Mapping of Resource in Particular Demands by Onshore and Offshore. It Displays All Records in form of grids and reports.

Languages: Asp.Net(.aspx),C#, Javascript,SQL-Server,Web Applications.

Summary:

- Created and Developed Resource Management for Add, Update for Any Resource.
- Created and Developed Daily Weekly Status Report For all Resources.
- Created and Developed Attrition Report for Admin Users.
- Created and Developed Master Reset Password For All Users.
- Created and Developed Export to Excel in Demand Search Screen.
- Involved in creation of stored procedures in MS Sql Server-2017.
- Coding and Validation Of Textfields in All Pages.

Company 2: Logicfield Solutions LLP. **Duration**: (17/11/16) to (04/12/18)

Years: 2.1 years

Role: Software Engineer

Project 1: ClarendonParker-International.

Client 1: ClarendonParker-International, Bahrain.

Description: ClarendonParker-International | Developer(Asp.Net) Application.

ClaredonParker is an International Recruitment consultancy in Kingdom of Bahrain. It has services like permanent and temporary recruitment, HR consulting recruitment process and activities. Registered clients are also given access to their own portal, This facility allows clients to post new jobs over the Internet, check the status of open positions and see the CVs of Shortlisted Candidates.

Languages: Asp.Net(.aspx),C#, Javascript,SQL-Server,Web Applications.

Summary:

- Designed and developed pages using html, css and jquery.
- Designed and developed Super admin signin and signout.
- Designed and developed user dashboard using bootstrap.
- Backend Database with Sql Connections.

Company 1: Mangalam Separations. **Duration**: (01/01/15) to (03/10/16)

Years: 1.9 years **Role**: System Engineer

<u>Project 1:</u> Company Application <u>Description:</u> Application Support.

Summary:

- Application Enhancements as per the Client Requirements.
- Accounts Updation and support.

Certifications:

- Certificate of Appreciation(SPOT Award) in Infosys.
- Undergone React.Js,(Redux & Flux) Training in Infosys.
- Designing Using ASP.NET By Taggin Technologies.

EDUCATION:

Under Graduation: (B.Tech – CSE)

Course : Bachelor of Engineering.

University: SRM University, Kattankulathur, Chennai, Tamil Nadu.

Diploma: (Computer Science Technology)

Course : Diploma

University: V.S.V.N.Polytechnic College, Virudhunagar, Tamil Nadu.

> Higher Secondary: Matriculation Higher Secondary School.

Course : SSLC

University: C.E.O.A Matriculation Higher Secondary School, Madurai-2, Tamil Nadu.

Personal Details:

Father's Name : S.KannanGender : Male

DateOfBirth : 31-08-1990Nationality : Indian

• Language : English, Tamil.

Declaration:

I am hereby; declare that all the information given above is true to the best of my knowledge and belief.
