Debasish Das

Java Developer

As a Java developer, I am looking opportunities in the technology industry to apply my expertise in the development and implementation of high-quality software solutions. With a strong background in **Java programming**, **Spring Framework** and **Agile methodologies** and am confident in my potential to **lead** projects to successful completion while collaborating effectively with cross-functional teams.

EDUCATION

Msc IT
Ravenshaw University
07/2019 - 08/2021 *Cuttack,Odisha*

PERSONAL PROJECTS

e-Health Care Management System (12/2022 - 03/2023)
- Designed and implemented a healthcare management system that reduced employee workload by 50%.
- Empowered hospitals to efficiently manage healthcare processes, providers, patients, and other critical data and information.
- Created a 100% accurate operational management system for hospital administration with robust data security measures.
- Operations included Patient Management, Doctor Management, Appointment Management, and User Management
- Utilized **JSP, Servlets**, **Html**, **CSS**, **Bootstrap**, **JavaScript**, **MySQL**, **Eclipse IDE** and **MySQL Workbench** to build and launch the healthcare management system.

e-Library (09/2022 - 12/2022)
- Designed and developed a web application for library operations automation and computerization.
- Created a system for member registration, book issuance and returns, and other related processes.
- Simplified managerial workload and increased efficiency through automation of library processes.
- Ensure system accuracy to simplify library procedures and reduce manual work.
- Utilized **JSP**, **Servlets, Html**, **CSS**, **Bootstrap**, **JavaScript**, **MySQL**, **Eclipse IDE** and **MySQL Workbench** to build and launch the library management system, resulting in a **60%** reduction in required staff and improved overall efficiency.

INTERNSHIP

Developer Virtual Experience Program
Accenture
02/2023 - 03/2023 *Remote*
Achievements/Tasks
- Spearheaded technical requirement definition, **architecture redesign**, and system scaling to the cloud, ensuring seamless on-premise to cloud infrastructure transition for clients.
- Demonstrated proficiency in reading, comprehending, and debugging code, while executing unit testing to optimize system performance and cut down errors.
- To ensure customer satisfaction with product functionality and design, performed User Acceptance Testing (UAT).
- Overseen security maturity assessments and implemented **IAM policies** and permissions to secure the **software development lifecycle (SDLC).**

SKILLS

Java | OOPs | String Handling | Arrays
Multithreading | Wrapper Class
Exception Handling | JDBC | Servlets | JSP
JSTL | Spring | Spring MVC | Spring-Boot
Oracle | SQL | MySQL | Html 5 | Css 4
JavaScript/ ES8 | Angular 14 | JUnit
Adaptability | Teamwork | Presentation Skill
Problem Solving

ACHIEVEMENTS

Demonstrated proficiency in Java and its Frameworks through personal projects or coursework.

I led a team of 4 people & contributed original ideas to the completion of our academic assignment.

Fundraised in "Tare Zameen Foundation" for 2 months

CERTIFICATES

Full-Stack Java Development Program
(04/2022 - 03/2023)

Hacker Rank Java(Basics) Certification
(01/2023 - 01/2023)

Developer Virtual Experience Program by Accenture
(02/2023 - 03/2023)

Certification Of Completion in Java Programming
(12/2021 - 01/2022)
