PROJECTS

- ❖ **Auto Chair Parking System**
  This automatic chair parking systems are being developed for the comfort and safety of the people. We created a chair that parallel parks itself. In this chair we used one RF input to provide interrupt signal which will feed data to a micro controller Arduino that will control its motors using finite state.

- ❖ **An IOT Based Intelligent Solution for Pigeon Pea Disease Detection**
  Pigeon pea is one of the most important legumes grown in semi-arid tropical regions and young seeds are consumed fresh as a vegetable. To detect the disease in pigeon pea, we have designed a device which will help in early detection of disease and will also suggest some fertilizers and pesticides for the plant.

INTEREST
