Projects Undertaken

Underwriting, New Business, Policy Servicing & Claims

Sapiens Intelligence is an advanced analytical solution specifically   designed for Insurance Organizations. Smart Store comes with an insurance-specific data structure, data   marts and logical models tailored to insurance business domains – based on many years of experience in implementing multiple analytics solutions at insurers globally.

Info Master includes advanced capabilities, such as full mobile support, self-service analytics, and data visualizatio And it supports pre-defined reports dispatch, ad-hoc reports creation, graphical dashboards.

CPG Retail

V3 is a Customer Relationship Management solution developed by British American Tobacco and is developed around the principles of the BAT TM & D Strategic Management Framework.

It caters for the execution of Trade Marketing and Distribution activities within end-markets and despite using the universally relevant global TM&D principles as its foundation, provides end-markets with a suitable degree of flexibility to tailor the solution to their specific requirements. Analysis and reporting forms a key part of the V3 solution. It helps the end market assess the current market scenarios and take tactical & strategic decisions regarding the Trade marketing operations.
