Object-oriented design, Algorithms, Data structures

Testing and Debugging

Unit testing, System testing, Integration testing

Mobile App Development

Swift, React Native, UI Design, Auto Layout, Web Service Integration, REST APIs

Summary

Results-driven development lead with over 8+ years of experience in mobile app development. Skilled in requirement specification, software design, coding, testing, and maintenance. Adept at leading teams and delivering high-quality solutions that meet client needs. Expertise in developing intuitive and feature-rich applications for iOS and Android platforms. Proficient in Swift, React Native, and UI design using auto layout concepts. Experienced in web service integration and REST APIs.

Experience

AdroitMinds Software Labs
iOS Development Lead

2015-10-12 - Present

Led a team of developers in the design, development, and delivery of mobile applications. Successfully managed and executed multiple projects, ensuring on-time delivery and meeting client requirements. Collaborated with stakeholders to define project scope, gather requirements, and create detailed technical specifications. Mentored junior developers, providing guidance on best practices and fostering a collaborative work environment. Developed robust and scalable mobile applications using Swift, React Native, and other technologies. Implemented UI designs with auto layout concepts, ensuring an intuitive and user-friendly experience. Integrated web services and REST APIs to enable seamless data exchange between mobile apps and backend systems. Conducted thorough testing and debugging to ensure high-quality software deliverables.

Education

SNIT

2012 - 2015
Masters's Degree in Computer Application

Dhempe College of Arts and Science, Goa

2009 - 2012
Bachelor's Degree in Computer Science

Languages And Frameworks

SWIFT	**SwiftUI**
UIkit	**Javascript**
iOS	**React Native**

Tools / Applications

Xcode	**Appstore Connect**
GitLab	

Projects

RunnerApp

Product tracking application for stores. Developed scanning functionality for salesmen to request products based on barcode scanning. Implemented real-time availability status updates for salesmen. Integrated TSC printer for barcode printing. Technologies used: Swift 5, barcode scanning, TSC printer integration.

ReadyNWash

Application for car wash administrators. Simplified membership and single-pass services for customers. Streamlined customer check-in and service completion process. Developed for both iOS and Android platforms using React Native. Technologies used: React Native, customer scanning, iOS, Android.

Cadvil SPOT

SPOT is an in-house social network developed in Swift 5, designed to foster a happier workplace by rewarding employees for their health and contributions to company success. Promoting enhanced communication and engagement, SPOT features continuous updates on birthdays, new hires, resignations, and events, with options for likes, comments, and adding achievements. It also supports instant feedback through surveys, company-wide announcements, and micro-training sessions. With 800+ downloads, it demonstrates its growing popularity among organizations.

Kinan

Kinan, developed in Swift 5, is a streamlined app connecting employees and customers to the latest organization updates. Tailored for HR, executives, managers, freelancers, and clients, it offers instant access to company announcements, events, alerts, progress tracking, surveys, evaluations, knowledge transfer, policies, and engagement tools. The app further boosts user engagement with redeemable loyalty points. With 200+ downloads, it's a reliable and secure platform for insights on the go.

YourCrew

YourCrew, developed in Swift 5, is an interactive app tailored for teens, offering a supportive network during their formative years. It allows users to build a "Crew" of trusted individuals for guidance, problem-solving, and more. While emphasizing personal connections, YourCrew bridges the gap to professional resources if needed (though it doesn't directly provide professional help). With over 1K downloads, this app stands as a testament to the necessity of supportive platforms during adolescence.

CSCC Members App

Experience with an app that provides users with immediate notifications on exclusive promotions and offers. The app also integrates a digital membership card feature, allowing members to access their details straight from their devices, reducing the need for physical cards. Additionally, the platform offers a seamless experience for members wishing to update their personal details, allowing them to make changes online and avoid waiting times at reception.

iDcard

Virtual ID Card app, developed in Swift 3, offers users an intuitive interface to effortlessly find and redeem discounts from nearby sponsors. Incorporating GPS-proximity features and real-time alerts for available discounts, the app has seen significant adoption with 10k+ downloads, highlighting its user appeal and functionality.

CBAS Analytics

CBAS - Cadvil POS, developed in Swift 4, is a cutting-edge cloud-based POS system designed for comprehensive sales analytics. Tailored for management, it provides insights into daily and monthly sales, comparisons to previous periods, customer demographics, and detailed statistics by shop, employee, product, and category. With continuous enhancements planned, this platform has garnered 100+ downloads, showcasing its utility and user trust.
