- Javascript
- Python
- Django
- Core Java
- C
- flutter Dart
- Php
- SQL
- mongodb
- Digital Marketing
- Communication skills

Projects

- **1. Educationpoint website**

  2. Animal Detection system for wildlife safety and conservation web application.

  1.Educationpoint was my own made website for engineering students i published it for students which made thier life easy.I made it using html,css and hosted it on google .It was totally made by me and on my website there was more than 10000 traffic.

  2. Animal detection for wildlife safety and conservation was my final year project it was very interesting.It was made using html ,css,js,mysql,php.

  In my both projects i was the head and i have pressure taking power and i take full responsibility and guarantee to complete it.
